

CISCO WATERWAY MIX

This 50/50 mix of Perennial Ryegrass and Tall Fescue forms a quick, tough stand to hold soil and withstand traffic.

Plant at 40-50# per acre.

To achieve the best stand: Drill early spring or late August. May use up to 1 bu. Oats per acre with Waterway Mix if desired. If broadcast seeding, use higher end of rate. Rough up the soil (shallow) then broadcast and cultipack. Addition of fertilizer will help quick growth and establishment.
