

COMPLETE FEED FOR STARTING AND RECEIVING CATTLE

PURINA® ACCURATION® STARTER COMPLETE HL

A complete feed for starting calves weighing 600 lb or more. The feed is formulated to provide intake modifying properties.

FEATURE

BENEFIT

Complete feed with roughage

Palatable feed that provides all nutrients required in rations for starting calves that supports optimal feed intake and gains and improves transition to growing and finishing rations. No added roughage required.

Formulated using proprietary Intake Modifying Technology®

Regulates number and size of meals which improves feed efficiency and reduces digestive and metabolic problems in starting cattle.

LongView research data supports the use of Diamond V Original XPC in starter diets. Diamond V Original XPC in ACCURATION Starters optimizes rumen performance which translates to healthy feedlot cattle performing to their potential. Research has shown Original XPC supports ration palatability, consistent feed intake, average daily gain and feed conversion of weaning calves.

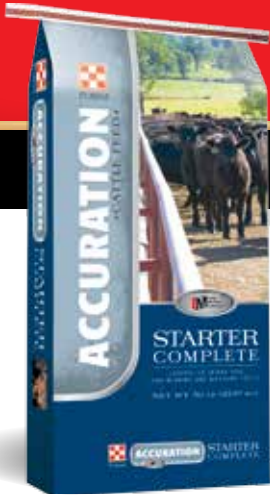

Rapidly restores trace mineral levels to jump-start the immune system of nutritionally challenged stressed cattle.

Drug options available

Help increase gains and decrease morbidity.

PRODUCT CODE	OPTIONS	BAG/BULK	SIZE DIAMETER	FEEDING RATE
0049062	Non-Med	Bulk	Textured	9.0 lbs per day
0049063	Non-Med	Bag	Textured	9.0 lbs per day

0049066	DX 0.0033%	Bulk	Textured	1.51 lb/100 lb body weight

COMPLETE FEED FOR STARTING AND RECEIVING CATTLE

PURINA[®] ACCURATION[®] STARTER COMPLETE HL

CAUTION: Use only as directed.
 Intended for feeding beef cattle only.

MINERAL / VITAMIN	LEVEL	MINERAL / VITAMIN	LEVEL
Crude Protein (Min)	14.0%	Salt (NaCl) (Min)	0.25%
<i>This includes no more than 2.3% equivalent crude protein from non-protein nitrogen</i>		Salt (NaCl) (Max)	0.75%
Crude Fat (Min).....	3.5%	Potassium (K) (Min)	1.0%
Crude Fiber (Max).....	15.0%	Vitamin A (Min)	2,400 IU/lb
Calcium (Ca) (Min)	0.5%	Ruminant meat and bone meal free.	
Calcium (Ca) (Max)	1.0%		
Phosphorus (P) (Min)	0.5%		

QUALITY CONTROLLED BY PURINA RESEARCH

DIRECTIONS:

Feed as a complete ration at the rate of 9 pounds per head per day to pre-conditioned beef cattle, pre-weaned and weaned beef calves or to beef calves upon arrival in a feed yard for a period of 7 to 10 days.

IMPORTANT:

This product is to be fed only to the animal species as directed on this label. Follow these management practices.

1. When making a ration change, allow 7-10 days for animals to adjust to the new ration.
2. Provide a source of fresh clean water at all times.
3. Do not allow fine material to accumulate in feeders.
4. Provide adequate bunk space for each animal. Bunks should be well protected and well managed to prevent feed from becoming wet and molding.
5. When fed from a self-feeder, adjust feeder to minimize quantity offered accumulating in trough.
6. Cattle should be vaccinated against enterotoxemia.
7. Consult your veterinarian for recommended health program for your area.
8. Have feed before cattle at all times. In groups of cattle there are certain animals who experience chronic bloat, or other digestive disturbances, and consequently, are poor performers. In addition, feed consumption in excess of 3-3.5% of body weight, severe weather changes resulting in erratic feed consumption and poorly managed feeding practices can increase the incidence of bloat in all cattle. If bloating does occur, the above management practices should be reviewed. If bloating continues, feed 2-3 pounds of hay per head per day or begin switching cattle to a growing ration over a 5-7 day adaptation period.
