

FEATURES

- Enhance Recovery
- Battle Fatigue
- Palatable
- Easy to Mix

Packaging: 15 lb buckets and 3..0 lb pails

Oral electrolyte for performance horses. Helps replenish electrolyte losses associated with fatigue, dehydration, heat injury, muscle cramping, reduced gut function and exercise.

How do you know if your horse needs electrolytes?

- Does your horse sweat when exercised?
- Is your horse sweating when hauled?

Electrolytes before, during and after exercise can delay the onset of fatigue and improve recovery time. With AQUA-AIDE® its simple, it can be top-dressed on feed or mixed into a water solution.

Features:

- Formulated for the demands of performance horses
- Feeding directions specific for heat stress and workload
- Shown to improve horse water intake
- Feed as top dress or mix with water
- Easy to measure and mix

Feed Directions—Horses Maturing to 1000 lbs

Option 1

For optimum results

Aqua-Aide® Mixed into Water	Mix 4-scoops of Aqua-Aide® powder into 1-gallon of water and provide free-choice to horses shortly after exercise.
--	--
