

Forage Pro™ Paddock Formula

FEATURES

- Quality Amino Acids
- Added flax
- Concentrated Feeding levels
- Chelated Trace Minerals

Packaging: 50 lb Paper Bags

For All Horses

Forage Pro Supplements are premium equine concentrates designed to be fed to horses where the ability to feed individually is not feasible. Forage Pro – Paddock Formula should be provided to horses eating grass pasture or hay. Provide access to pasture or hay equal to 1 ½ to 2% of their body weight per day. Forage Pro – Paddock Formula should be provided to horses that are confined to limited pasture or in dry-lot situations. Adequate forage must be available so that horses are not forced to over-consume the Forage Pro Supplement.

Get the Forage Pro™ - Paddock Formula Advantage:

- Formulated to complement grass pasture or forage
- Designed to be fed “free-choice” to horses where individual feeding is not feasible
- Restricted consumption when fed to horses on smaller tracts of pasture or paddocks
- Consumption should be approximately 1 ½ to 2 lbs per day for a 900-1100 lbs horse
- Formulated to help prevent nutritionally induced developmental growth problems
- Nutrient content to support muscle growth and development
- Mineral and vitamin levels that meet the mare’s prenatal nutritional requirements
- Added vegetable oil for enhanced hair-coat condition

Other Features and Benefits:

- A combination of protein and essential amino acids like lysine and methionine for optimum muscle growth development
- Balance of minerals and vitamins for proper growth and development
- Added vegetable oil for enhanced hair coat
- Salt and magnesium added at a level to control consumption when fed to horses on small pastures or paddocks

Feed Directions—Horses Maturing to 1100-1300 lbs

Horses should be introduced slowly by offering about 1 lb of mineral per head per day for the first few days. The mineral can be increased to about 2 lb a couple days later to allow consumption to stabilize. Once stabilized, the mineral can be offered “free-choice”. Never offer more than a weeks supply at a time. Intake should be monitored closely to avoid excessive consumption.

Forage Pro consumption should range from 1 ½ lbs to 2 ½ lbs per day for 900 – 1300 lbs horses

PROVIDE UNLIMITED ACCESS TO CLEAN, FRESH WATER

Locate weatherproof feeder close to the water supply.

Never provide more than a week supply at a time.

If consumption level is outside of the 1 to 2 ½ lbs range, remove this product and contact your Progressive Nutrition Representative.
