

**When you're looking for the "Best of the Best" look no further!**

**AgXcel's GX5 Fertilizer Application System works smarter for you.**

AgXcel's line of **GX5 Smart Hydraul-X Systems** are designed with the smart producer in mind! Don't rely on inferior systems or designs, the GX5 runs 15% more efficient than other designs with its unique "Sweep Flow Technology" (SFT). The SFT keeps hydraulics flowing freer, smoother and cooler which leads to less stress on your hydraulic system with cooler running hydraulic fluid. The GX5 comes in 4 different sizes to accommodate even the most demanding Fertilizer Application requirements. Like all AgXcel, 5 Steps to Successful Planting products, the GX5 works seamlessly with the G1 and G2, 2x2 solutions and the Rebounder Seed Cover's in-furrow Applications.

### AgX GX5 Features & Benefits Include:

- **What you see is what you get!**
- Robust & reliable, year after year
- Draw – The GX5 diaphragm system will have no issues drawing liquid from the front mount of a tractor or from a pull cart behind your implement
- Preconfigured & assembled from the factory ready to install.
- No complicated user guides
- No intricate adjustments, simply bolt the GX5 to your toolbar or tractor and you're set!
- Customized to YOUR needs
- Made in the USA

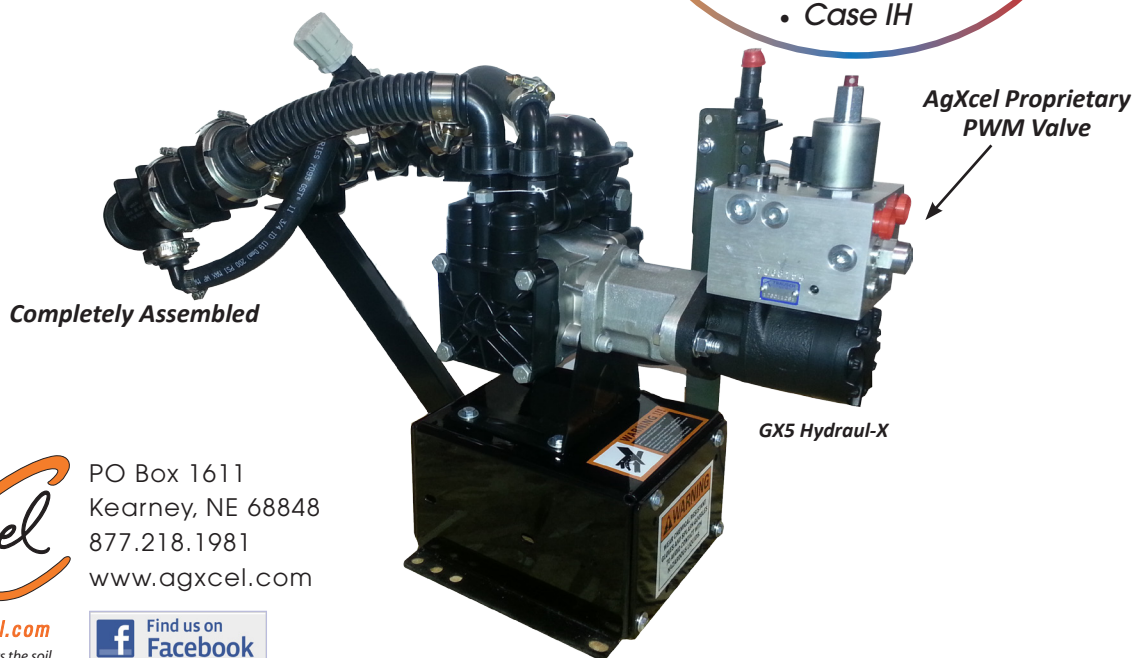

### AgX GX5 Hydraul-X Series

*designed to work smarter, not harder*

AgXcel GX5 Smart Hydraul-X Specifications		
Pump Model	# of Diaphragms	Max Flow GPM
GX5 X70	2	15
GX5 X115	3	25
GX5 X160	4	35
GX5 X250	6	55

### INTEGRATION INTO THE FOLLOWING MONITORS:

- Green Star
- Ag Leader
- Trimble
- TopCon
- Raven
- Case IH

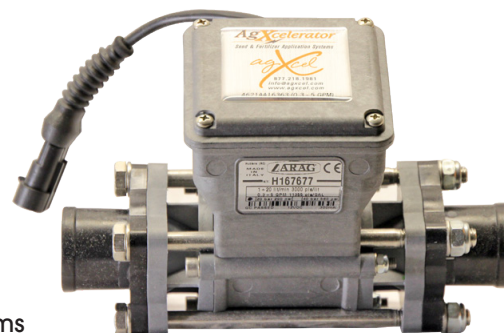

## GX5 Hydraulics

**We have multiple options to meet your needs!**

**Take Control with the AgXcel Rate Systems.**

### Orion Magnetic Flow Meter

- No mechanical moving parts for longevity
- Low sensitivity to turbulence
- Ideal for variable rate application
- Measures flow at 70 pulses per gallon
- Performance not affected by product viscosity or density
- Measures flow at 1135 to 2271 pulses per gallon on hydraulic systems

### GX5 Universal Mt. Toolbar Bracket

- Allows the GX5 to be mounted on any toolbar or saddle tank mount
- Convenient and affordable

### FM750 Flow Meter

- Affordable
- Measures flow at 70 pulses per gallon

### AutoX Compact Mini

Looking for a compact controller for single rate management? Consider our AutoX Compact mini controller. Packed with all the important options for managing either in furrow fertilizer placement or 2x2 this controller has it all. The AutoX Compact is a 3-section automatic rate controller for liquid and anhydrous with built-in boom switches on the console. Its all-in-one design makes it a convenient, simple user friendly package at a very economical price.

AutoX- Compact Mini

### AutoX Compact Features:

- Records area and volume in 3 independent pairs of counters so individual jobs can be tracked
- On-the-go rate adjustment
- Push-button auto/manual feature for spot treatments
- Minimum flow feature to ensure proper application pattern as ground speed slows to extremes
- Precise rate control regardless of field conditions
- Flow based control

### GX5 JD 1770 Mounting Bracket

- Allows for a custom install
- Easy install on JD 12, 16, and 24 row planters
