

Our 20' Deluxe Windmill Aeration System pumps tons of air, even more than other companies that sell "dual diaphragm" models. The secret is our new, patent pending "BalCam II" Technology that allows us to pump more air with a single diaphragm. The benefit to you is that you'll have less moving parts, less bearing's and fewer diaphragms to service and maintain. This unit is rated at 3.0 - 4.5 CFM and includes everything you'll need to install your unit and begin aerating your pond. It also has a 5-year warranty on the compressor which is unmatched in the Industry.

Accessories in the Deluxe Windmill Aeration System include:

- 1 -20' Windmill with our new patent pending BalCam II technology with Stainless Steel components
- 1 -roll of non-weighted 100' airline
- 2 -airstones so you can aerate in two separate locations
- 2 -foot valves
- 2 -rolls of 100' weighted airline to sink your airline to the bottom of the pond
- 1 -set of pivot points for easier maintenance
- 1 -2-way selector valve to better regulate airflow between the two airstones
- 3 -hose connector packs
- 2 -airstone housing buckets
- 2 -duck decoy markers
