## Climax Timothy

---

### FEATURES

- Medium-late maturity
- Most commonly used in hay mixtures
- Tall, fine-stemmed, good leaf production
- High quality, highly palatable

Timothy is the oldest cultivated forage grass in North America. It is highly palatable as well as winterhardy. It performs best in cool, moist conditions. Timothy is well known and preferred in the horse market. It matches well with clovers or birdsfoot trefoil due to its late maturity. The following varieties offered are ranked in the order of maturity.

### TIMOTHY FEATURES

Plant type: Perennial Grass  
Planting dates: March–May or Aug–Sept  
Soil pH: 5.0–7.0  
Soil adaption: Wide  
Planting depth: 1/8"–1/4"  
Approximate seeds/lb: 1,200,000  
Seeding rate: 10–12 lbs/A ; 1–4 lbs/A mix  
Days to germination: 10–14  
Main usage: Pasture, hay  
Height at maturity: 24"–40"  
Length of stand: 2–5 years  
Reproduces by: Seed
