Goat Mineral is intended to be fed free choice to goats. Fortified with vitamins and minerals essential for proper growth and health. Contains **Amaferm**® to increase digestibility in order to maximize the energy value of feed.

WINNER'S PROGRAM

Lowe's Pellets & Grain is a proud supporter of 4-H, FFA, and all of today's youth that are involved in the livestock industry. We applaud our youth customers for recognizing the hard work, dedication, and time it takes to prepare and exhibit their livestock in a competitive manner. Your desire to succeed is what drives the people at Lowe's Pellets & Grain to produce high quality feeds for your every need. We hope you earn the opportunity to take advantage of our Winner's Program. Contact your dealer for more information.

Developed to meet the needs of EXPERTS in the show arena

Formulated by top industry nutritionists

Manufactured with the HIGHEST QUALITY INGREDIENTS to MAXIMIZE the genetic potential of your animal

EXCALIBUR II

Crude Protein: 15%
Crude Fiber: 16% Max
Crude Fat: 4.25%
Medication: Rumensin

Complete pelleted feed to be used as an initial creep feed and starter for goats from birth to six months, as well as a developer for maximizing the genetic potential of the show buck and doe. Fortified with the proper balance of vitamins and trace minerals to help ensure the "look" and bloom wanted for the demanding show ring. Contains **Amaferm**® to increase digestibility and maximize the energy value of feed.

GUSSY UP

Crude Protein: 15.5%
Crude Fiber: 22% Max
Crude Fat: 2.5%
Medication: Rumensin

A 15.5% complete pelleted feed with higher fiber levels and lower energy, designed to maintain body composition without over-conditioning. Contains **Amaferm**® to increase digestibility in order to maximize the energy value of feed. Medicated with Rumensin for the prevention of coccidiosis.

TRIGGER

Crude Protein: 16%
Crude Fiber: 12% Max
Crude Fat: 3.25%
Medication: Rumensin

Complete pelleted feed formulated for the show wether to get the unique trim muscle shape that has a handle. Fortified with BGY35 to increase fiber digestibility and improve feed utilization. Medicated with Rumensin for the prevention and control of coccidiosis.

A
AMAFERM®

Amaferm® is a natural feed additive that acts as a prebiotic. It delivers more microbial protein and energy to the animal through increased digestibility by stimulating fungal branching, microbial enzyme activity and bacterial growth.
