PIG PROTOCOL

Receiving Period

Administer 10 ml of Vita Charge paste to pigs before hauling to ensure appetite will stay consistent upon arrival.

As soon as pigs arrive at their new home, administer 10 ml of Vita Charge paste. Continue to administer Vita Charge paste daily until appetite becomes steady. Then slowly introduce Sure Champ Pig pellets.

Preparing for the Show

Administer 10 ml of Vita Charge paste once a week or as needed to ensure appetite stays consistent. For three consecutive days, before the show, give a 10 ml Vita Charge paste dose twice a day.

At The Show

As soon as pigs are unloaded off the trailer, give a 10 ml dose of Vita Charge paste. Continue with a 10 ml Vita Charge dose once or twice a day, while at the show, depending on the amount of appetite stimulation needed.

Off Feed

If you have a pig that has completely gone off feed, give two 10 ml doses of Vita Charge paste daily until appetite has returned.

High Stress Situations

Weather, changes in feed and sickness are all stressful on your animals. Consider giving a 10 ml of Vita Charge paste once a day until stressful situation is over or appetite improves.

Farrowing Crate

Give a daily dose of 10 ml of Vita Charge paste when gilts are in the crate. Once they farrow, continue daily doses or consider adding Sure Champ Pig pellets to your sow ration.

Note: Remember that all Vita Charge products are designed to work with Sure Champ pellets. Using these products in conjunction will help create maximum results.
